FAQ

- Q:** Is the U60 USB Computer Speaker plug-and-play??
- A:** Yes, the U60 speaker is completely plug-and-play. It requires no drivers or software installation. Simply connect the speaker to your computer's USB port, and it will automatically start working.
- Q:** What devices are compatible with the U60 USB Computer Speaker?
- A:** The U60 speaker is compatible with most devices that have a USB port, including Windows PCs, MacBooks, laptops, desktops, and other devices that support USB audio output.
- Q:** How is the audio powered and transmitted?
- A:** The U60 speaker is powered through a USB connection, which also transmits the audio signal. No additional power supply or 3.5mm AUX cable is required.
- Q:** How do I troubleshoot if there's no sound from the speaker?
- A:** If you experience no sound, ensure the U60 is securely connected to the USB port. Check your computer's audio settings to make sure the U60 speaker is selected as the default output device. Also, adjust the volume using the inline controls and ensure your system volume is turned up.
- Q:** Does the U60 speaker require a separate power adapter?
- A:** No, the U60 is USB-powered and does not require any external power adapter. It runs directly off your computer's USB port.

• off

How to Use Connect the Speaker

Plug the USB cable into your PC or laptop's USB port. Ensure the connection is secure. The speaker is powered through USB and does not require an external power source.

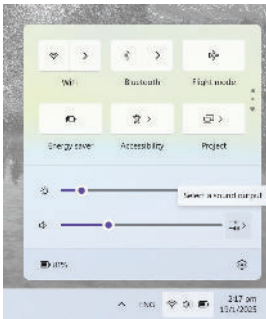

Please plug the speaker into the USB3.0 port of your computer. The USB3.0 port can feed more stable electric power to the speaker, which can effectively avoid disconnection.

Set it work on Computer

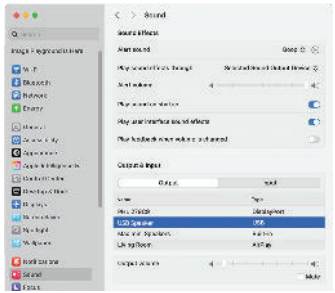

For Windows

- Click the "Speaker" icon in the taskbar.
- Select "Sound Output" > click "More Volume Setting" for system sound setting.

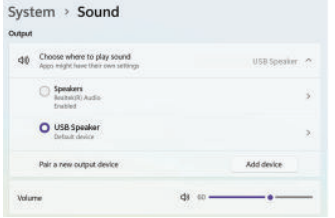

For Mac OS

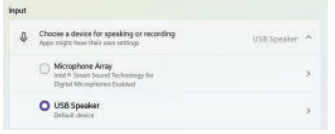

- Click the "System Preference" icon in the taskbar.
